

More than 70.000 m² of roof area were supplied with lawn, flowerbeds, party areas and walkways for the visitors of the Expo.

Conception

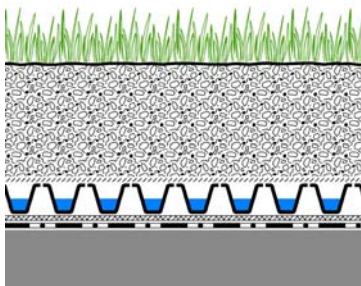

The theme of the Expo 2008 Zaragoza, promoted as “little world exhibition” by its hosts, was “Water and Sustainable Development”. Almost all nations presented their concept for a sustainable water management.

The promenade above the contiguous roofs of the “Pavillones de las Naciones” granted an impressive view over the river

Ebro, the city of Zaragoza with its famous cathedral “El Pilar”, as well as the gay hustle and bustle of this small, but beautiful exhibition.

Along the roof garden’s paths, there were rest areas with benches surrounded by flourishing gardens, lawns, as well as areas for company events, receptions and birthday parties.

System Build-up

- Plant layer
- System Substrate
- Filter Sheet SF
- Floradrain® FD 40-E
- Protection Mat SSM 45
- Roof construction with root resistant waterproofing

A drip irrigation was installed in the flowerbeds.

Benches set along the walkways invite the visitors to rest.

Project Data

Area: ca. 70.000 m²

Construction Year: 2007–2008

Greenroof Provider:
VICOM S.L., Madrid

Contractor:
Aimad, Madrid

Coordinates:
41°40'10.54"N 0°54'04.99"W

The vegetation on the 10m high roofs is adapted to the Spanish climate.

The complete area could be seen from the cable car.

Lighting and tables complete the appearance of the roof landscape.
